

FIT3179: DATA VISUALISATION 2

5 DESIGN SHEETS

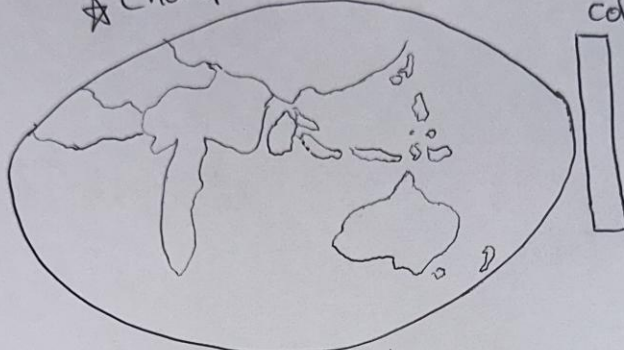

32491581

Author: William Leigh
 Date: 16/10/2025
 Sheet: 2
 Task: Design Sheets

Layout

★ Choropleth map

Colour ~~the~~ saturation

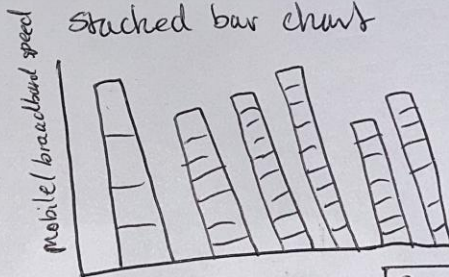

Fixed ~~bandwidth~~ or mobile speeds

Pie/Donut chart

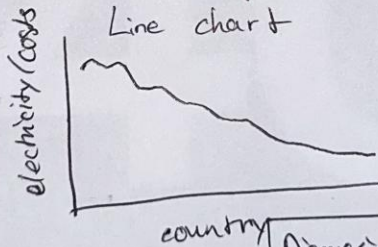

of countries within a certain speed

Stacked bar chart

Ranked countries per continent

Line chart

Components
 - each chart will represent a key focus either for the main 2 charts, or expanding on it.
 - will explain factors from main two charts

Focus:

- visualising both mobile/broadband data.

- having charts to also visualise how the data affects the country

- compare with Australia

- Main focus is choropleth map

Discussion:

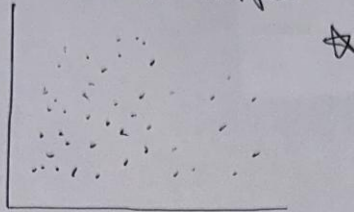

Pros: displays data nicely with large visual, easy to interpret.

Cons: may be too large for web page.

Layout
 Bubble/scatter plot

Population

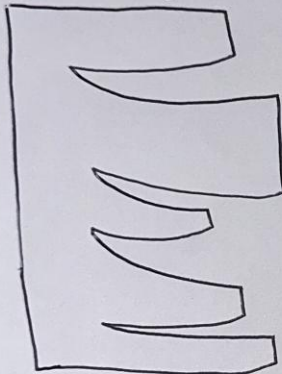

Mobile or
 Fixed Broadband
 Speed

Pie chart

of Countries
 per population
 group

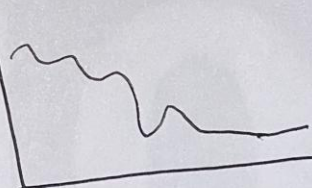

Sunkey diagram

Mobile/Fixed
 Broadband speed
 groupings

electricity/costs

Line chart

Country

Focus:

- Bubble/Scatterplot as it can visualise 1 of two of the speeds as well as population.
- can expand on either later on in the visual

Components:

- since its a plot, I can include a slider to filter countries based on speed
- I can also include a drop down menu, so I can filter by continent to narrow down datapoints.

Discussion:

Pro:

- can filter by continent and speed, so can narrow down data for findings

Cons:

- the scaling can ruin the plot as populated/unpopular countries co-exist

Sheet: 4

Task: Design sheets

Layout
Back to Back Bar chart

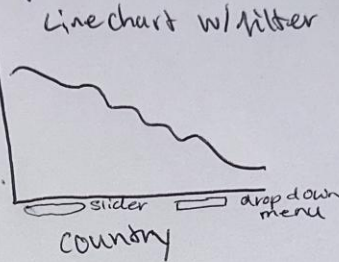

Pie chart

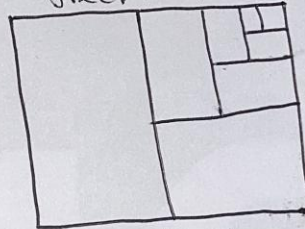

of countries
within a speed
range

electricity cost

Tree Map

of people who
use certain device

Focus:

- the line chart with a filter, as I will be able to cycle different charts, visualising different outcomes and usages of having fast and slow speeds
- will provide insights that extends the population and speed charts.

Components:

- I will apply a filter which will be useful in terms of space and readability.
- convenience having it all in one place
- slider to increase and decrease amount of countries

Discussion:

Pros:

- can be convenient and have all related graphs together

Cons:

- can be very long and hard to read if many countries

Author: William Leigh

Date: 16/10/2025

Sheet: 5

Task: Design Sheets

Focus:

- Main focus will be on the first 2 charts, displaying both speeds and population.
- basis for the visualisation, and after viewed, it will expand on analysis and other important factors regarding mobile/broadband speed.

Components:

- Every chart will be interactive with a tooltip.
- For graphs with filters, a slider will also be included for further analysis or further filtering.
- The visualisation follows excellent sightlines so it is easy to follow.

Discussion:

Pros:

- each graph builds on each other and follows a sightline downwards.
- flows into next expansion and numbered analysis with interactive charts.

Cons:

- scaling of charts might be an issue.
